

Creditsafe Credit-Check in Microsoft Dynamics 365 Business Central

Economic and credit worthiness check of your business contacts with Creditsafe

Would you like to check the solvency of your (future) customers, partners or service providers, reduce your credit risk and establish long-term successful business relationships? The "**Creditsafe Credit-Check**" app from **KUMAVISION** gives you easy access to the world's most frequently used credit agency "Creditsafe", directly from Microsoft Dynamics 365 Business Central.

Highlights

- Daily updated credit reports incl. request logging
- Queries from Business Central incl. direct contact creation
- Monitoring of companies
- Automatic update cycles
- Address validation for matching and updating company and address data in Business Central
- Predefined workflows for setting credit limits or blocking a sales activity based on the credit score
- Cost control and budget security through fixed-price model

Your Benefits

Reduce your processing times and identify risks at an early stage in order to avoid debt losses. Obsolete data and duplicated entries are a thing of the past - always work with validated creditor/debtor and contact data with correct company name and address.
